

Why to **wait** until **University** to offer **Global elective** to students and why we don't begin introducing **children** to a world beyond their own community at a much **younger age**.

Our futures are increasingly linked to the challenges of the global community. For students to take part in this changing world, they must understand it. **The 21st century student will work for international companies. They will manage employees from other cultures, collaborate with people all over the world and solve global problems.**

PHASE 1 & 2: GLOBAL TEACHING & LEARNING:

GTEP Global teaching & learning program has helped SG High School students, the skills necessary to not only live in our increasingly interconnected world but to also lead and thrive as global citizens.

1. Creative Thinking
2. Appreciation of Culture
3. Evaluation of Information
4. Cross-Cultural Communication Skills
5. Perspective - taking skill
6. Intelligent humility
7. Divergent thinking
8. Technological - BBC Micro bit

Unique Learning Practice

Learn through various innovative methodologies being implemented at GTEP.

Our pedagogy comprises a balanced mix of International studies, presentations, panel discussions, simulation exercises, and games.

Our unique competence lies in our innovative pedagogy.

International Faculty

In our effort to provide quality training in education, we have brought together an experience rich and culturally varied UK faculty for Subject Matter Expert and Value-Added Programs.

They are not just renowned academicians but accomplished scholars with experience from various industries, thereby bringing a uniquely practical approach to learning.
